MONITORING CONSOLE

Mainly for operators of ARC. Provides an excellent unique interface for handling alarms.

- ◢ Reports and statistics
- ◢ Operator is able to work with tens of alarms
- ◢ Video-verification of alarms

DATA EDIT CONSOLE

Mainly for administrators of ARC. It offers a simple definition and management of premises.

- ◢ Copying of buildings from a template
- ◢ Division into groups
- ◢ Import and export of prepared templates

24/7
Technical support

Help-desk
and consultatio

Many video-manuals
available

Datasheet ◢

The Cloud ARC service means the operation of the JABLONET PRO program on Jablonet servers. The servers are located in data centers in Prague (main) and Ostrava (backup), both in the Czech Republic. Data centers are equipped with backup Internet connectivity, redundant power supply, including redundant UPS and backup diesel generators. An integral part of the Service are also the necessary drivers for receiving the User's equipment. Furthermore, GSM modems required for backup SMS routes and outgoing SMS notifications are also part of the Service (SIM cards for GSM modems are the property of the User). In the technical specification, the Provider shall supply the User with a list of IP addresses and TCP/UDP ports for device communication and the kernel communication service, to which the User's client consoles will be connected.

- ◢ Service availability up to 99.9% (depending on the selected SLA)

- ◢ The data center meets TIER III certification

- ◢ The technology runs on the VMWare Vsphere 7 platform

- ◢ Backup with the latest version of VEEAM 11

- ◢ Redundant connectivity 1Gb/s

- ◢ Supervision of our technicians over the technology 24/7

- ◢ MS SQL DB

- ◢ Online support for ARC operators 24/7

- ◢ Unlimited number of objects in the DB

- ◢ Unlimited number of users and monitoring workstations

- ◢ Email / SMS notifications

- ◢ Control panels reception: over 30 drivers: JABLOTRON, EBS, GC-10, SIA IP DC-09, CID

- ◢ Video verification: IP camera, web cameras, video streaming (RTSP)

- ◢ Possibility to connect 3rd party radio / telephone / IP receivers
