24/7  
Technical support

Help-desk  
and consultatio

Many video-manuals  
available

**Try it  
for free**

# Datasheet

With the JABLOTRON ARC II, you get an all-in-one PC on which monitoring software is preinstalled. To monitor your JABLOTRON control panels, just turn on the computer and you can start operating ARC. Thanks to communication via CLOUD JABLOTRON, you can download the description of detectors, zones and users. Working and editing in ARC is thus very simple.

- HW - all-in-one PC: Processor: Intel Core i5-1240P, Display: 23.8" FHD (1920x1080), HDD: 512GB SSD, RAM: 2x 8GB SO-DIMM DDR4-3200
